PLACE JACQUES COEUR

PEDESTRIAN ZONES AREA

- > Pedestrian zone 1: 50 sqm
- > Pedestrian zone 2: 50 sqm
- > Pedestrian zone 3: 250 sqm
- > Pedestrian zone 4: 470 sqm

STAGE :

Surface = 37 sqm
Distributed floor load = 300kg/sqm

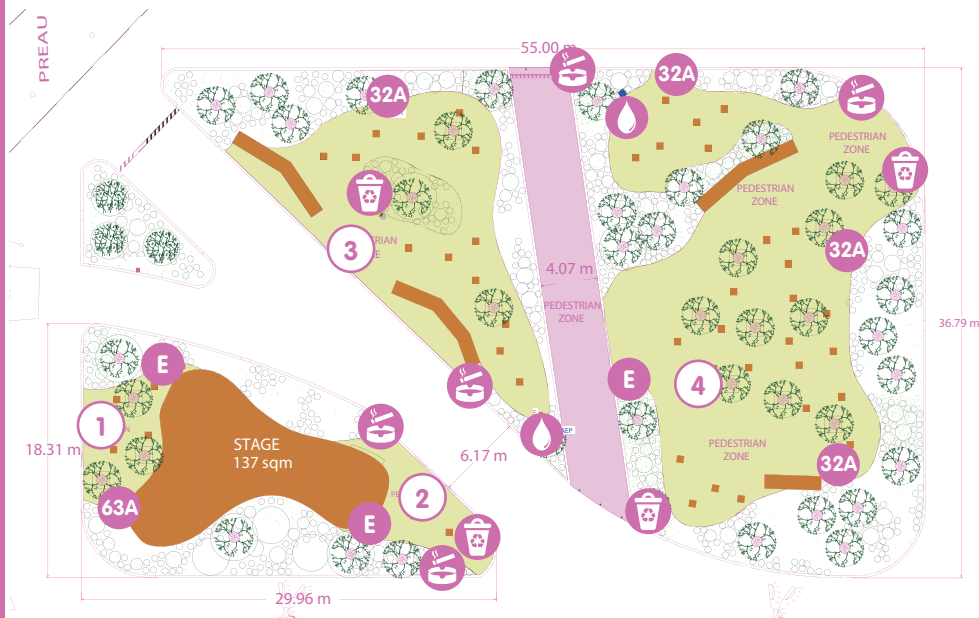

Services

Water fountain
2-stream waste bins

TOTAL AREA of place Jacques
Coeur = 61.0m x 36.80m

LEGEND

Water fountain + water supply

2-stream waste bin

Eco-friendly cigarette butt ashtray

Possible electrical connection

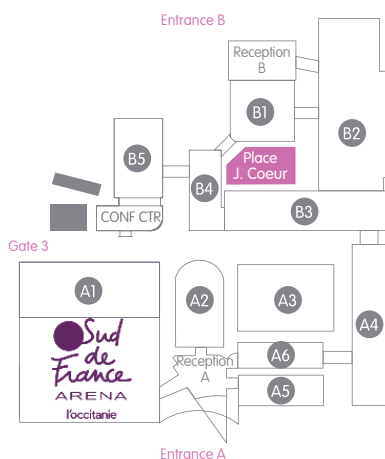

32A 32A power supply

63A 63A power supply

Wooden benches and seating

Update April 2024 - Service Exploitation

SUSTAINABILITY

> Inaugurated in September 2023, Place Jacques Coeur is the culmination of a project that fully aligns with our commitments to eco-responsibility and our desire to transform the event complex into a more welcoming place for all our users.

> The primary objective was «renaturation», which was complemented by two additional goals: soil desealing and rainwater management. These actions allow rainwater to infiltrate the soil and groundwater instead of flowing into the stormwater network, thereby reducing the risk of runoff flooding and lowering pollution levels.

> Project Keys figure:

1,082 plants have been planted and 196m³ of water is absorbed by the soil during each regular rainfall.
